

# FIRST GRADE SCIENCE POWER STANDARDS

---

## **Earth Science Power Standards**

- I can group rocks by color, shape, and size.
- I can tell how rocks and soil are the same and different.

## **Life Science Power Standards**

- I can use animal characteristics to sort them into groups.
- I can describe the ways an animal's habitat provides for its basic needs.
- I can tell that animals need space, water, food, shelter, and air.
- I can understand the changes in animal and plant life cycles.
- I can understand that animals pass through the same life cycle stages as their parents.

## **The Nature of Science and Engineering**

- I can explain my observation.
- I can recognize that accuracy is important in observations.
- I can understand that living and non-living things need all parts to work well.
- I can understand how people use tools to gather information and solve problems.
